Education

Mahindra University, India 2026 – Present

B.Tech. in Computer Science

Relevant Coursework: Calculus, Differential Equations, Introductory Electronics, Chemistry, Computing

Gyan Ganga Educational Academy, CBSE – India 2026

CBSE Senior School Certificate Examination (Grade XII)

Overall: 85.4% — Mathematics: 80% — Physics: 88%

Technical Projects

METAR Parser TypeScript

- Designed and implemented a TypeScript parser for aviation METAR weather reports, converting structured weather messages into typed, usable data.
- Implemented tokenization, message validation, field parsing, and handling of variable METAR components and malformed input.
- Built and deployed an interactive web interface for parsing and inspecting METAR messages.

0/1 Knapsack Capital Allocation Simulator Python

- Implemented a dynamic programming model for allocating limited capital across competing projects to maximize simulated return.
- Evaluated allocations across varying budget and project constraints and compared optimal solutions against a greedy allocation strategy.

Research & Engineering Experience

IRIS National Science Fair Finalist, 2025

- Finalist at India's national-level science and engineering research competition.

Design Patent India, 2026

- Granted an Indian design patent arising from a student engineering research project.

Aerospace Engineering Training Program Feynman Aerospace

- Selected for a paid technical training program at an aerospace engineering firm and completed an assigned engineering task as part of a student cohort.
- Gained exposure to engineering workflows, technical problem-solving, and collaborative project execution.

Technical Skills

- **Programming:** Python, TypeScript, SQL
- **Web:** React, Next.js, HTML/CSS
- **Data & Engineering:** MySQL, PostgreSQL/Supabase
- **Tools:** Git, GitHub, SolidWorks, XFLR5, L^AT_EX
